WHAT MAKES US THE GLOVE EXPERTS?

WE HAVE ONLY EVER CREATED GLOVES AND IT'S ALL WE WILL EVER DO. WE SIMPLY DO ONE THING AND WE DO IT EXTREMELY WELL.

The Glove Company's mission is to provide quality protection, safety, utility and comfort to people who work with their hands in potentially damaging and dangerous working environments.

NUMBERS SPEAK FOR THEMSELVES

GLOVE PRODUCT LINES

YEARS OF SAFETY EXPERIENCE

REGISTERED TRADEMARKS

GUARANTEED QUALITY

- All products independent third-party tested
- Meets all relevant glove standards
- International accredited quality control manufacturing
- AS/NZ Standards accreditation. EN Standards accreditation

INDUSTRY INNOVATORS

- Revolutionised the glove industry
- Continually researching & developing to offer Australian workers industry leading gloves
- Welcome enquiries & requests for new or enhanced products from both corporate and retail clients

STATE OF ART DISTRIBUTION CENTRE

- 2200m² DC with 3 loading bays
- Over 1000 pallet spaces
- Experienced distribution team
- Efficiency focused procedures

GLOBAL DEFENCE SPECIALIST

- Registered as an official supplier of The Australian Government Department of Defence.
- Supplies Defence NATO codified NSN numbered gloves

THE GLOVE COMPANY'S INNOVATIVE ACHIEVEMENTS

2007

- The first commercially available thin, ultra-tough Black Disposable Glove in Australia and New Zealand.

2008

- The World's Toughest Disposable Glove IP is released in Australia and New Zealand.

2009

- The First Low Sweat Disposable Glove IP in Australia and New Zealand.

2010

- The first Hi-Vis Orange Disposable Glove IP is released in Australia and New Zealand.

2013

- The Glove Company® is approved to supply the Australian and New Zealand Defence Forces with various products carrying NSN (NATO) Codification.

2014

- TGC® launch cost-saving initiatives for users with Ambidextrous Non-Disposable Gloves.

2015

- World's First Lightweight Chemical Gloves, Chloronite® are released, with an unheard of 11 letter rating.
- The release of the KOMODO® range of high-quality Mechanics gloves, Cut resistant gloves and material handling gloves.
- The release of TGC® Orange Hi-Vis Nitrile Gloves and Chloronite® Chemical Gloves to the USA.

2021

- Further expansion of our Rocket range with grip. Development of our first lightweight ultra cost-effective BLACK AIR® nitrile gloves.

2019

- New KOMODO® Dragon Skin Needle Resistant Gloves. Dragon Skin needle resistant armour designed for picking up, cleaning or disposal of hypodermic needle stick hazards.

2018

- New **EASY ON Technology** - Technology you can feel! Disposable gloves that are easy to put on no matter what. Designed for wet, sweaty or dry hands. IP Designed and Manufactured by The Glove Company®.

2017

- Australia and New Zealand's first ultra-thin, fingerless cotton glove. An inner Glovlet® designed to reduce perspiration.

2016

- Major global expansion with the appointment of distribution partners in:
 - America, Canada & Mexico
 - UK & Ireland
 - Germany

2022

- Introduced our new sustainable technology BioGlove™ & launched a new chemical resistant dual-layered glove, X-Guard.

2023/24

- Introduced Voltage Glove for working on EV/Hybrid vehicles.
- Expanded our TGC® range with the brightest neon green glove in Australia, TGC® Neon Green
- Innovated heat safety with Black Heat™, the 560mm extended cuff version of our famous Blue Heat® glove.

2025

- Launched the biggest breakthrough in electrical & hand safety in 40 years with KOMODO Vigilant® PVAD® Gloves, the world's first electricity detecting glove.

2026

- Expanded the Chloronite® range with Green Chloronite®, a textured green nitrile glove and Chloronite® Butyl, a heavy-duty butyl glove.
- The highly anticipated Cut F glove, KOMODO® Vigilant® Apex F, launched.

Learn About.. Glove Standards – Because not all gloves are made equal

**Glove standards provide a guide only. It is recommended to check that the gloves are suitable for the intended use. For specialised applications contact your trusted glove provider.*

The most common standard disposable gloves should feature is EN374. This framework classifies how well a glove will protect you against chemicals, micro-organisms, and viruses.

There are many parts to EN374. The most important to look out for is Part 1 and Part 5.

EN374-1: Chemical Resistance

EN374-1 tests a glove's chemical permeability against 18 different chemicals. If the glove is proven effective against a chemical, it is assigned the appropriate letter relating to that chemical.

There are over 15,000 chemicals used commercially and industrially worldwide. EN374 approved chemicals are carefully tested and selected to provide the best overview of a glove's chemical performance.

Chemicals and their related letter

A Methanol	G Diethylamine	M Nitric acid 65%
B Acetone	H Tetrahydrofurane	N Acetic acid 99%
C Acetonitrile	I Ethyl Acetate	O Ammonium hydroxide 25%
D Dichloromethane	J n-Heptane	P Hydrogen peroxide 30%
E Carbon Disulfide	K Sodium Hydroxide 40%	S Hydrofluoric acid 40%
F Toluene	L Sulphuric Acid 96%	T Formaldehyde 37%

The time it takes a chemical to permeate a glove is assessed and the breakthrough time is recorded as a 1-6 performance level.

The glove's performance level for each chemical is not listed on the EN374-1 symbol. If you would like to learn your glove performance levels, contact The Glove Company® or your glove distributor.

Breakthrough Time BTT (mins) Performance Level

>10	Level 1
>30	Level 2
>60	Level 3
>120	Level 4
>240	Level 5
>480	Level 6

Gloves are then classified as Type A, B, or C, depending on how many chemicals they withstand during testing.

TYPE A

Withstands at least six different test chemicals for at least 30 minutes each.

TYPE B

Withstands at least three different test chemicals for at least 30 minutes each.

TYPE C

Withstands at least one test chemical for at least 10 minutes.

EN374-5: Resistance to Virus, Bacteria & Fungi

EN374-5 tests a glove's resistance to viruses, bacteria, and fungi. It is a simple pass or fail test.

The below symbol will display if the gloves protect against

ASTM F2675/F2675M: Arc Flash Tested

ASTM F2675/F2675M measures the amount of thermal energy a glove can withstand before causing a second-degree burn. The result is a performance rating, called the Arc Rating, expressed in calories per square centimetre (cal/cm²). Gloves that meet this standard help protect workers from arc flash-related heat and burn injuries.

EN407: Heat Resistance

There are two symbols relating to gloves that offer protection against thermal risks.

If a glove is not tested against, or does not achieve a level one on the flammability test, the heat without flame symbol (right) must be displayed and the letter X will replace the 1-4 digit for flammability (shown below).

To test flammability, the glove is mounted above a flame. Once the flame is removed, the length of time in which the glove continues to flame is recorded, this is the 'After Flame Time'. To achieve a level one rating for flammability, the glove must have an after flame time of 15 seconds or less.

Heat Resistance symbol

Resistance to Contact Heat*		
Performance Level	Contact Temperature	Threshold Time (seconds)
1	100°C	≥15
2	250°C	≥15
3	350°C	≥15
4	500°C	≥15

EN1149-3: Anti-Static

EN1149-3 tests how quickly gloves can release static electricity into the air. Gloves that meet this standard are called electrostatic dissipative. They safely discharge static, protecting the wearer and their surroundings.

To pass, the glove material must release at least 50% of built-up static charge within 4 seconds.

The below symbol will display if the gloves protect against

The below symbol will display if the gloves protect against

The below symbol will display if the gloves protect against

EN388: Mechanical Risks

Test	Performance Level					
	1	2	3	4	5	
Abrasion Resistance Cycles	100	500	2000	8000	–	
Blade Cut Resistance (Coup Test)	1.2	2.5	5	10	20	
Tear resistance (newtons)	10	25	50	75	–	
Puncture Resistance (newtons)	20	60	100	150	–	
	A	B	C	D	E	F
Cut Resistance (TDM-100 test) (newtons)	2N	5N	10N	15N	22N	30N

0 indicates the glove did not meet the minimum performance level for that individual mechanical risk test.

X indicates the glove has not been tested or the test method is not suitable for the glove's design or purpose.

Food safety - What is HACCP?

A developed system designed to identify and minimise points of failure. HACCP is also used as an international food safety certification for a variety of successful products. If a product shows the HACCP logo it is of the best food safety standards.

The importance of independent testing - in the safety industry it is crucial

Hand and wrist injuries are one of the most common work-related injuries, so hand protection that works with you is a must!

The Glove Company® cares about *quality* and *trust*, we ensure all our gloves are independently third-party tested, accredited, and certified to international standards.

Unless the results come from an independent third-party accredited test facility, you are only taking someone's word for it. All of the Glove Company's products are compliant to AS – AS/NZS – ISO – BS – EN – ASTM – NFPA, and other international standards.

TGC® BLACK NITRILE GLOVES

GLOVES WITH ATTITUDE®
DRAGON SKIN®
NEEDLE STICK RESISTANT

DRAGON SKIN® BRANDED ARMOUR PLATING

KOMODO® Dragon Skin® Needle Stick Resistant Gloves are designed for picking up, cleaning or disposal of hypodermic needle stick hazards. The gloves help prevent needle stick injury, as the last form of hazard control.

Offering more dexterity than any other needle stick resistant glove, the KOMODO® Dragon Skin® Needle Stick Resistant gloves, are less bulky and more flexible than traditional Needle Stick Resistant Gloves.

More dexterity allows users better hand control when picking up hypodermic needles, rapidly decreasing the risk of needle stick puncture.

- ✓ Three interconnected layers of Dragon Skin® – Engineered Armour Plating
- ✓ Certified and independently tested in Australia
- ✓ Needle Stick Resistant Certification ASTM – F2878-10 for protection against 21 Gauge Hypodermic Needle to 6Nm of Force
- ✓ Natural rubber and wrinkle grip
- ✓ Breathable and flexible back of hand
- ✓ European standards rating for mechanical hazards – EN388:2016 4544BX
- ✓ Needle stick resistance is on palm only

GLOVE STANDARDS

EN388:2016

4544BX

This product is cut & puncture resistant but **not** cut & puncture proof. Do not use with moving or serrated blades or tools. Always conduct a safe test to make sure it is suited for your use. This product is only available in Australia and New Zealand. Not to be sold, used, imported or distributed in any country outside of Australia or New Zealand.

A WORN COATING IS NOT A WORN-OUT GLOVE

Most workers bin their gloves the moment the coating looks rough.

On a coated KOMODO® Glove, the cut protection comes from the engineered fibres, not the coating.

The coating's role is chemical and abrasion resistance and grip, so it naturally shows wear first. Underneath, the cut barrier is still intact.

**FOR JOBS NEEDING
SPECIALTY GLOVES**

CHLORONITE®

CHEMICAL GLOVES

LIGHTWEIGHT ADVANCED CO-POLYMER TECHNOLOGY

Chloronite® is a lightweight chemical glove that exceeds industry standards. The snug fit allows for an extremely dexterous performance so you can say goodbye to big chunky chemical gloves!

Withstands a vast range of hazardous chemicals, boasting a rare 9-letter rating under the EN374 standard. Trusted by the front lines – Chloronite® Chemical Gloves are certified for NATO and NSN codification for use by the defence force and aviation industry.

The proven twin material blend, co-polymer, is the result of exhaustive research and development by The Glove Company® to produce a world leading chemical protection solution.

Ideal for use with damaging solvents, volatile fuels, oils, corrosive acids, burning alkali and hazardous chemicals.

BENEFITS

- Extended splash protection **300mm Long Cuffs**
- Empowers unmatched dexterity thanks to the agile twin material blend
- Accelerator-free design allows extended comfortable wear
- Textured fingers enhance grip in wet, slippery, and dry environments
- Vibrant red colour boosts visibility in low and dark light conditions

GREEN CHLORONITE®

CHEMICAL GLOVES

TEXTURED HIGH-PERFORMANCE NITRILE PROTECTION

Green Chloronite® is a textured nitrile glove engineered for protection against incidental chemical contact. The raised surface texture improves grip on wet, oily, and greasy surfaces, reducing the risk of slips and dropped items.

The high-performance nitrile offers strong tensile strength and abrasion resistance, maintaining its protective barrier through demanding, repeated use. It carries an EN374 Type A chemical resistance rating, making it suitable for use during potential incidental contact with a large variety of solvents and chemicals.

Extended safety cuffs allow Green Chloronite® to be worn over a garment sleeve. Cotton flock lining absorbs moisture and supports comfort during extended wear.

Ideal for use with damaging solvents, volatile fuels, oils, corrosive acids, burning alkali and hazardous chemicals.

BENEFITS

- Extended **330mm safety cuffs** for wrist protection
- Wide cuffs allow room for garment sleeves
- Moisture-absorbent cotton flock liner for comfort
- Raised texture improves grip in wet, slippery, and dry environments
- High-performance abrasion-resistant nitrile

WHEN THINGS GET HEATED BLUEHEAT® KEEPS YOU COOL

Your best way to beat the heat, BlueHeat® is the everyday solution to temperature affected items up to 150°C*.

Manufactured with comfortable cooling cotton material and coated with void-filling latex that produces a super wrinkle finish. The raised wrinkle texture minimises the surface area that contacts high temperature items, ensuring you can handle heated situations confidently.

The rugged surface of grooves and ridges produces unbeatable grip and control in wet, dry, or even oily conditions, reducing the risk of temperature affected items dropping or slipping.

*Level 2 contact heat only on palm

*Not suitable for welding or any open flame

BENEFITS

- Certified heat contact reduction through wrinkled latex coating
- Built with breathable, lightweight materials for prolonged cool comfort
- Extraordinary gripping abilities reduces risk of dropping items
- Enables maximum dexterity for confident full-hand movement
- Fully washable and reusable
- Offers tough abrasion and puncture resistance

STAY COOL WITH BLACKHEAT™ EXTRA REACH GLOVES

Enjoy the same proven performance of BlueHeat®, now with an **extra long 560mm cuff** for above elbow coverage. Handle temperature affected items up to 150°C* with this unique BlackHeat™ glove.

Manufactured with comfortable cooling cotton material and coated with void-filling latex that produces a super wrinkle finish. The raised wrinkle texture minimises the surface area that contacts high temperature items, ensuring you can handle heated situations confidently.

The BlackHeat™ extended cuff helps reduce exposure to spills, splashes, or incidental contact with surfaces during long reach tasks or movement in tight spaces.

*Level 2 contact heat only on palm

*Not suitable for welding or any open flame

BENEFITS

- Extended 560mm long cuff for above elbow coverage
- Certified heat contact reduction through wrinkled latex coating
- Extraordinary gripping abilities reduces risk of dropping items
- Enables maximum dexterity for confident full-hand movement

Glovlet®

THE ULTIMATE SWEAT MANAGEMENT SOLUTION

Designed for people whose jobs require them to use gloves every day.

Glovlets® are fingerless, reusable, natural cotton liner gloves. Featuring moisture wicking technology, Glovlets help keep your hands feeling fresh, natural, and comfortable all day every day.

Wear Glovlets® under your daily protective gloves for heightened comfort, warmth, sweat management or help preventing dermatitis. Glovlets® also act as an extra layer of hygiene prevention at public gyms and sports recreation centres.

Any frequent glove user knows damp donning and re-donning is a problem our Glovlets® were designed to solve.

BENEFITS

- Natural cotton nylon blend for the ultimate sweat management solution
- Provides an easy and affordable solution to dermatitis
- Noticeably soft material creates a highly breathable barrier between your hand and outer glove
- Fully washable and reusable

APPLICATIONS

- Great for Gyms, Sports and Boxing
- Factory & Process workers
- Mechanics
- Food preparation & Manufacturing industries
- Electronics & Assembly industries
